SATO CODE

The Escape Room Across The City

WHAT IS SATO CODE?

Your team will discover clues, solve puzzles and beat challenges, just like in an escape room. But Sato Code won't be locking you up inside a room! We'll set you to explore the city and find several clues downtown.

WHAT KIND OF CLUES?

You might find a code to decipher in an art piece or a secret message in a shop window. Any and everything around the city could be a Sato Code clue with codes to crack!

HOW DO WE PLAY?

Break up into multiple teams, 2 to 4 people each team. Download the Sato Code app. The app will display different pieces of information for each player. It is a multi-player game: the phones are connected and interact among them. As a team, you'll combine the bits of information received to make it through the game.
